Article: More on gravitational waves (Barvain + Weber)

PHY 600 Reading Questionnaire

What is the main idea of the article?

Further back + forth between Barvain + Weber

Why is this topic important to gravitational wave detection?

Further discussion on the subject of the first mentions of gravitational wave antenna + Weber's vs Barvain analysis

What questions would you need to have answered before you could honestly say that you understand this topic?

It's hard for me to distinguish which arguments are mostly "ad hominem" vs. based in actual merit.

Can we disentangle this?
